DOUBLE PICKET

Our Double Picket option is available across all grades and all styles of aluminum fencing. Featuring reduced spacing between every picket, this design adds strength and provides an extra layer of security while keeping a clean, uniform look. Double Pickets are ideal for families who want to prevent children or pets from slipping through, or for projects where a tighter panel profile is preferred. With the durability and low maintenance of aluminum, Double Pickets combine safety, style, and lasting performance in any setting.
