CANTILEVER GATES

Our Cantilever Gate is engineered for exceptional smoothness and heavy-duty performance, all without the need for a ground track. Its counterbalanced design allows it to glide open effortlessly, making it especially well-suited for commercial and industrial settings with uneven terrain or high-traffic access points. Constructed from fully welded, U.S.-sourced aluminum, this gate promises long-lasting durability, minimal maintenance, and a clean, professional aesthetic.

- ✓ Certified Powder for AAMA 2604 G85 Salt Spray Testing
