THERE'S STRENGTH IN OUR SCREWS

BENEFITS:

- ✓ Hand-installed screws provide superior strength.
- ✓ Screw-based assembly enables the replacement of pickets.
- ✓ Square-head stainless steel screws with color matching.
- ✓ Each picket is securely attached to the rail.
- ✓ Our assembly has no plastic parts or subpar alternatives.
- ✓ Panel remains rackable with grade of ground.
- ✓ A stronger appearance.

Buy American, Buy America Made in USA, and Assembled in USA

- ✓ **Domestic Powder**
- ✓ **Domestic Ownership**
- ✓ **Domestic Extrusions**
- ✓ **Domestic Manufacturing**

The verbiage of Buy American, Buy America, Build America, Made in USA, and Assembled in USA can often lead to confusion. Antebellum, a company owned by USA citizens, manufactures its products in the USA using aluminum and powder that are also produced in the USA and meets the above stated requirements.

Antebellum Manufacturing follows a straightforward process. We acquire our extrusions in the USA, bring them into our plant in Ocala, FL where we proceed to cut, punch, notch, bend, weld, and manufacture the final product. Powder coating is done on site in our plant, then shipped across the USA to our valuable customers.

Antebellum offers a complete solution for 100% Made in the USA Domestic Aluminum Fence, Gates and Railing. We can certify your domestic project!

CERTIFIED DOMESTIC

About Us:

At Antebellum, we're more than just a manufacturing company. We're a family united by a commitment to deliver top-notch Aluminum Fences, Gates, and Railings to our partners all over the United States. Our products are more than fences; they're a part of our family. Our fence panels are named after our children. When you choose Antebellum, you're choosing a piece of our heart. Locally owned and operated in Ocala, Florida.

Antebellum's Commitment to Pre-Treatment Excellence

At Antebellum, we take pride in our pre-treatment process. We follow strict guidelines on the application process by employing Calvary Industries as our exclusive supplier for chemical treatment. This guarantees that our aluminum finish is top-notch, providing unparalleled quality to our customers. Additionally, our wash and rinse procedures are conducted using reverse osmosis water to further enhance the quality of our finishes. Thanks to the ADVANTECH S1471 sealer, we can offer our aluminum with a mill finish instead of powder coating, providing a distinctive appearance and purpose for those seeking that aesthetic.

Antebellum's 2604 Powder Certified

In 2019, Antebellum Manufacturing successfully attained TCI Certified Applicator status. Improvements to Antebellum's finishing process, because of the powder formulation devised by TCI, were both immediate and significant. Following an extensive powder coating line and process audit, our coated parts underwent Salt Spray tests to verify compliance with AAMA 2604 certification. This was accomplished in all instances. This certification further highlights our commitment to quality and demonstrates our capability to meet the necessary standards.

POWDER COATING

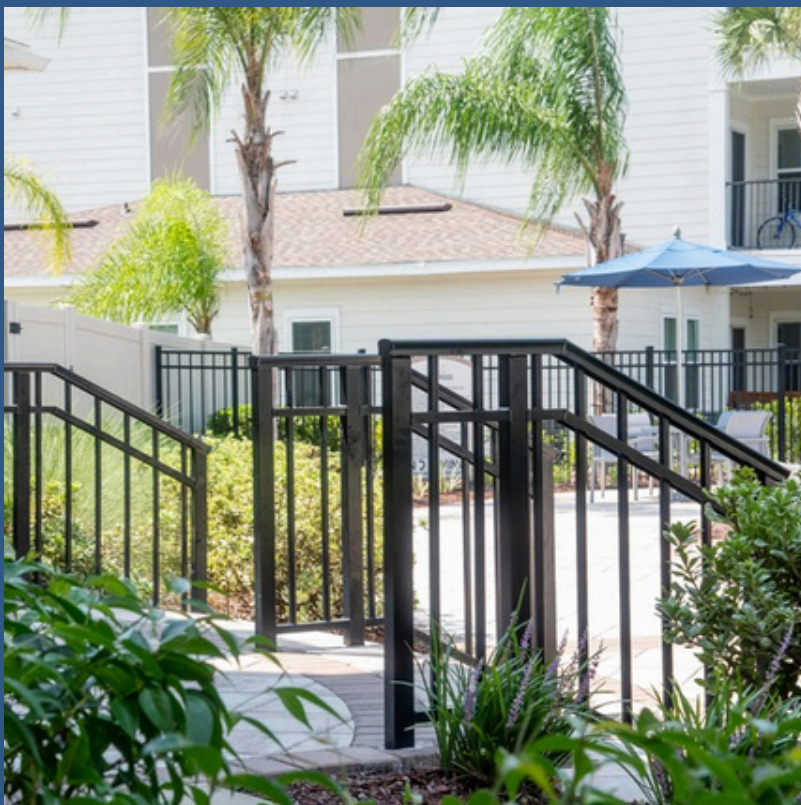

Powder coating is an essential element of an aluminum fencing system. Our aluminum surpasses the AAMA 2604 powder coating certification, which ensures it can endure over 3,000 hours of continuous salt spray testing. In many instances, our testing achieves results exceeding 12,000 hours.

AAMA 2604 is a standard for powder coating that encompasses testing for 3,000 hours of salt spray and humidity resistance.

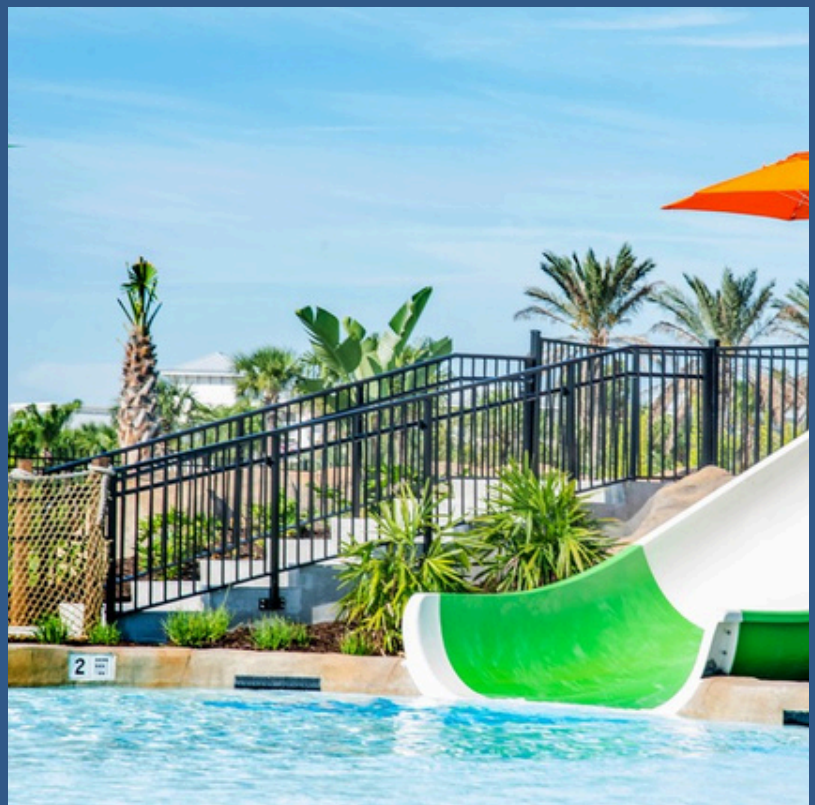

Custom Aluminum Railing

Our custom railing program caters to contractors seeking durable railing solutions. Each design is tailored to the specific job and fully customized. Included with the program are CAD drawings. This railing is entirely welded and arrives ready for installation.

These railings not only enhance the aesthetic appeal of a property but also provide essential safety and durability. Crafted from high-quality aluminum, they are designed to withstand the elements, ensuring long-lasting performance without the worry of rust or corrosion. Whether you're looking to add a modern touch to your urban condo or seeking a sleek, minimalist design for your apartment balcony, custom aluminum railings offer the perfect balance of style and functionality.
